with both men and women wearing latex because it makes them feel more bass ass than anyone else at the party while there is an initial shock at wearing latex once the process is down and people learn to use plenty of silicon lube to put latex on a person can make an indelible and unique fashion statement wherever they go this book is useful for people in engineering and education for writing project reports seminars conference research papers latex is becoming more popular day by day due to its excellent typesetting and ease of use but there is no good book available in the market which can talk in terms of the need of the student and or researchers this book is a ready reckoner for typesetting a good report book using latex it covers all necessary and essential information of latex required to typeset a good report book while typesetting our reports books we found that out of 2600 packages we hardly used not more than 20 packages and if the report book is heavy in the text then many time not more than 5 packages are ever required to typeset it this showed us a definite structure to follow for typesetting a report book latex
