are home to the largest cluster of ancient stone ruins found to date on earth adam s calendar is at

the centre of it all the oldest functioning megalithic sun calendar found to date since 2007 more than 5 million circular stone structures have been identified by michael tellinger and a small group of independent researchers these structures are not stand alone stone circles they are all connected to each other by channels of stone and held in a large mesh of agricultural terraces that cover entire mountains and resembles a never ending spider s web the great mystery is that the original stone structures have no doors or entrances indicating that they were not originally constructed as dwellings for people or animals additional research and the discovery of mysterious tools and artefacts indicate that the builders had an advanced knowledge of cymatics study of sound and knew how to use sound as a tool together with many ancient gold mines all this activity has been dated with various scientific techniques to well over 100 000 years and provides much support for the presence of the sumerian anunnaki on earth mining gold in southern africa a place often referred to as the abzu scholars have told us that the ?rst civilization on earth emerged in a land called sumer some 6000 years ago these archaeological ?ndings in southern africa suggest that the sumerians inherited much of their knowledge from an earlier civilization that emerged many thousands of years before them in southern africa the cradle of humankind building your own barns and outbuildings offers many benefits perhaps the most obvious being the money you can save about half the costs of any building project is the labor and by doing it yourself you can construct your building more economically or even put up a larger building on the same budget but another important benefit of building it yourself is the satisfaction that comes from improving your own landscape and surroundings a well constructed barn shed or outbuilding can be a source of pride for many years and will also enhance the value of your property in how to build small barns outbuildings monte burch takes readers step by step through the fundamentals of general construction from planning and laying out a site to do it yourself instructions on framing roofing wiring plumbing and much more
